To Whom it May Concern

Mr. Abdullah S. Al-Salloum has requested me to write him a letter of recommendation. Every year, dozens of students request me to write them a recommendation letter. However, I end up recommending only a few of them.

My direct relationship with Mr. Al-Salloum has been of academic nature. He was a student in both the Programming Languages and Computer Networks courses that I have taught at the Gulf University for Science and Technology in Kuwait.

The student's academic performance has been good but does not justly reflect his capabilities. He showed excellent abilities to clearly formulate problems, propose and evaluate various approaches to solving them, apply skillfully the appropriate mathematical techniques, analyze the results obtained for adequacy and decide on the course of action.

In particular, he distinguished himself by his keen scientific curiosity, his determination to achieve the task on hand, and his original ideas.

His sense of purpose and maturity were displayed consistently and throughout his undergraduate studies and are deemed to be outstanding.

Sincerely,

Dr. Wael Bazzi
Assistant Professor, Computer Engineering
American University in Dubai
